

Product sieving is now an essential requirement in nearly all industries. To obtain a quality controlled end product not only requires diligent ingredient choice but careful handling and processing. Removal of any substandard or unwanted matter is therefore a prime requirement.

Farleygreene "SIEVMASTER" sieving machines provide a cost effective, reliable and simple method of producing a constant material size by grading or check sieving of your powders, granules or liquids.

Sievmaster 'Slimline' 550

The 'Sievmaster Slimline 550' can be used as a simple means of check sieving into bins or containers. Used with the optional wheeled base assembly, it makes an ideal arrangement to sieve ingredients in small or large volumes.

The 'Sievmaster Slimline 550' Sack tip / Dust Hood station is the ideal method of introducing products from sacks into a mixing or collecting hopper. (N.B. Ask about our range of mixers 150 litre to 6000 litre). Either mobile or static arrangements are available, with platforms for those requiring extra high discharges. Direct feed into a vertical or inclined screw conveyor is also available.

To check sieve product into a static weigh bin, big bag or hopper the 'Sievmaster Slimline 550' is located above the inlet to provide an efficient and fast means of ensuring product reliability.

Typical Uses

- Check sieving ingredients
- Chemicals
- Foods
- Chemicals
- Sack discharging systems
- Narrow locations

Advantages

- Needs only narrow headroom
- High efficiency
- Easily adaptable
- Easy to clean
- Quick change
- All stainless steel construction

Accessories

- Oversize discharge
- Rare Earth Magnets
- 304/316 Grades ST.ST.
- Bespoke system design
- Fg connecting sleeves
