

Fast bending and folding service

When a customer needs spare parts, he is usually under time pressure. In order to be able to offer prompt services in such a situation, we have set up a fully-fledged bending and folding workshop.

Perfect bending technology requires the appropriate machinery, good material knowledge and a lot of practice.

With our experience in process engineering and mill construction, we understand your concerns without losing many words. We are proud of our short reaction times. With our location in Auenstein, directly next to the A1, we are within reasonable reach for every company.

+ Convincing bending results

With our «AFM Folding Press EP» we can react to all customer requirements. The hydraulic bending system and the exact coordination of the periphery allow high flexibility and lead to very precise results over the entire bending spectrum.

+ Technical data

- Press force: 100 – 160 t
- Bending length: 3100 – 4000 mm
- Maximum working speed: 10 mm/s

+ High flexibility

In order to help you solve bottlenecks or emergencies quickly, we also work on evenings and weekends.
