

## Timely repair service

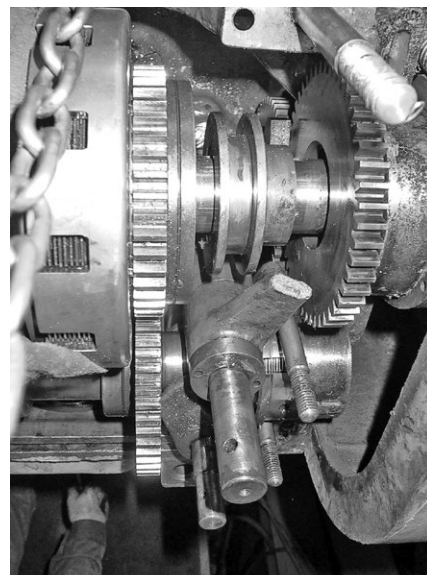

Good repairs must be quick, efficient and simple. If they are executed correctly, they even improve the performance of the original component.

Our repair team is represented by different professional groups. During our 17 years of activity throughout Switzerland, we have acquired a solid know-how that we consistently transfer to our team.

We carry out repair work at the customer's site or in one of our specially equipped departments. We implement efficient solutions with conventional mechanical processing machines and modern machines.

We implement efficient solutions with conventional mechanical processing machines and modern machinery. We knew 24/7 long before this term became a buzzword. Basically, we are there for you 24 hours a day.

From our location in Auenstein, directly on the A1, we reach every company within a reasonable period of time.

**Morewa AG**

Mühliacherweg 20  
CH-5105 Auenstein

#### + Machinery Park

In addition to conventional mechanical processing machines, we also have a modern machine park. This includes a CNC Plasma Oxy cutting machine and a CNC bending press from Bystronic.

#### + Small-series production

We perform repairs on client site or in our well-equipped workshop. Our equipment allows the production of small series.

#### + Industrial Service

Our team is trained for efficiency and fast interventions. Anytime an emergency happens, call us.
