

Dismantling in the food industry

Since its foundation, Morewa AG has been realizing the dismantling and demolition of highly productive industrial plants. By dealing with sometimes very challenging tasks and extreme technical situations, the company was able to acquire sound technical know-how and a fundamental understanding of the specialized processes in dismantling.

Over the years, a highly efficient team has been formed which is able to carry out the dismantling even during the running production. This team is made up of specialists from a large number of different fields. To work, our team uses modern machinery and special equipment with quick-change devices.

The 7/24 operation is the rule. Orders are also carried out abroad.

Deployed at Nutritec AG, Hochdorf

✚ **Dismantling and disposal of waste at Nutritec AG, Hochdorf.**

A plant from the 1970s was dismantled for the production of powdered products. In compliance with strict hygiene standards, Morewa AG developed the entire system in just two weeks.

✚ **Work safety and Environmental protection**

The company always follows the current regulations on occupational health and safety, environmentally conscious disposal of sensitive components and responsible handling of toxic substances.

✚ **Short-term response time**

Morewa AG is specialized in high efficiency and short time operations. Thanks to its central location directly on the A1 motorway, the company is in a central position for any mill in a wide and extensive area.
