

Efficient S&W piping system

Thanks to a partnership with the company S&W RohrSysteme we maintain a permanent stock of 7000 standardized articles.

With this extensive range, we are able to replace or assemble any piping component on site.

All our assemblers have many years of experience and work in 24 hours, 7 days a week operation. We supply connections with flanges, collars or plug connectors. The pipes are powder-coated, galvanized and also available in stainless steel.

+ 1-hour radius

With our location in Auenstein, directly on the A1, 85% of our customers are within a 1-hour radius.

+ Custom-made products

In addition to our standard range, we also manufacture special parts on request, which can then be assembled on your location.

+ Night and weekend operations

To ensure that you can continue to work as undisturbed as possible, we also install our solutions during the nights and weekends.
