

# Steel fabrication and construction work

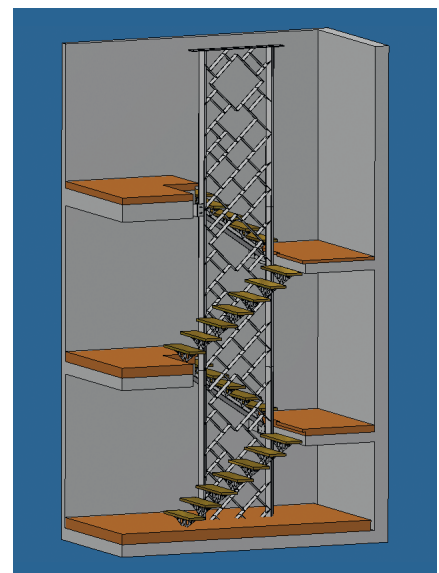

Adapted to the challenges of your production, we manufacture plant and machine components as well as components for the entire infrastructure.

We are – and you can take this literally – exclusively solution-oriented. We have a team made up of specialists from the most diverse professions, able to carry out their tasks without complications, even outside normal times.

For interventions that need to be carried out quickly and efficiently, we use our conventional mechanical processing machines. The precision work is carried out by our modern CNC machine park.

With our central location in Auenstein, directly on the A1, we are within reach of all companies.

#### + Production

- Machines and components
- Spare parts
- Funnels
- Containers

#### + Infrastructure

- Steel structures
- Balustrade
- Stairs
- Gates and doors

#### + Containers and pipes

- Modular silos
- Deposits
- Containers
- Cases
- Pipes and elbows
